

In response to the Office Action of December 29, 2006, please amend the application as follows:

IN THE CLAIMS

1. (Currently Amended) Textile product composed of a weft and a warp, in which the weft and/or the warp are composed of strips of non-woven fabric, wherein the non-woven fabric is composed of hydro entangled, thermo-bonded or spun-bonded fibres.

2. (Cancelled)

3. (Previously Presented) Textile product according to claim 1, wherein the non-woven fabric is composed of a material chosen from viscose, polyethylene, polypropylene, polyamide, cellulose pulp.

4. (Previously Presented) Textile product according to claim 1, wherein the non-woven fabric has a weight/surface ratio between 10 g/m² and 200 g/m².

5. (Original) Textile product according to claim 4, wherein the non-woven fabric has a weight/surface ratio of between 50 g/m² and 65 g/m².

6. (Previously Presented) Textile product according to claim 1, wherein both the weft and the warp are composed of strips of non-woven fabric.

7. (Previously Presented) Textile product according to claim 1, wherein the weft or the warp is composed of strips of a material other than non-woven.

8. (Original) Textile product according to claim 7, wherein said material other than non-woven is chosen from yarns, paper, synthetic fibres.

9. (Previously Presented) Textile product according to claim 7, wherein said strips of non-woven fabric and/or said strips of material other than non-woven have a width between 1 and 10 cm.

10. (Original) Textile product according to claim 9, wherein said strips of non-woven fabric and/or said strips of material other than non-woven have a width between 4 cm and 7 cm.

11. (Previously Presented) Textile product according to claim 1, wherein said strips of non-woven fabric are obtained from processing waste.

12. (Currently Amended) Procedure for the preparation of the textile product described in claim 1, [characterised in that] wherein the strips of non-woven fabric are subjected to weaving, realising a fabric in which the weft and/or the warp are composed of said strips of non-woven fabric.

13. (Currently Amended) Manufacture realised with the textile product [described in] according to claim 1.

14. (Previously Presented) Manufacture according to claim 13, selected from the group consisting of a cloth for cleaning floors, a duster or cloth for cleaning small surfaces in the home, tablecloth, napkin, matting, mat, mattress cover, bedspread, couch cover, cushion cover, car seat cover, and doormat.

15. (Currently Amended) Method for the recovery of trimmings from the processing of non-woven fabric, [characterised in that] composed of hydro-entangled, thermo-bonded or spun-bonded fibres, wherein said trimmings are interwoven to form a textile material, of which the trimmings of non-woven fabric constitute the weft, the warp or both.
